

**DESCRIPTION:**

Nickel Metal Hydride Rechargeable Battery,
AA Size

CHEMICAL SYSTEM:

Nickel Metal Hydride

SHELF LIFE:

Guaranteed for 500 recharges

NOMINAL VOLTAGE:

1,2 Volts

NOMINAL DIMENSIONS:

Ø 14,5 mm x 50,5 mm

TERMINALS:

Protruded positive(+) and flat negative (-) contacts

JACKET:

Foil jacket

APPLICATIONS:

All electronics devices e.g. toys, photographic equipment, audio appliances, lighting & torches.

STORAGE TEMPERATURE:

-20 °C to + 35 °C

NOMINAL WEIGHT:

29 g

BENEFITS:

- Most powerful rechargeable battery
- Super high energy
- Guaranteed for 500 recharges
- Ready to use, precharged
- Holds power up to 70% after 1 year once fully charged
- Cost savings and environmentally friendly

BATTERY HANDLING:

- Batteries are precharged
- Remove batteries from electrical device if the device is not going to be used for a long period of time
- Do not mix new batteries with semi-used batteries
- In order to maintain satisfactory cell/battery performance when being stored under an extended period of time, fully charging the cell/battery within 12 months period is highly recommended
- Battery should be stored in dry, cool, ventilated place. Keep away from heat source and fire. Storage temperatures outside the marked limit may result in reduced battery life.
