5. INSTALLATION

INSTALLATION OF THE RECEIVER

After connecting the receiver for the first time and selecting the correct AV input on your TV, the receiver's first welcome menu will be available – Installation of the receiver. To change parameters, use the navigation buttons in the middle of the remote control. See help at the bottom of the screen.

Select the following parameters one by one:

- 1. Language of the receiver
- 2. Country select the country of use
- 3. 5V power supply for antenna amplifiers (active antennas with amplifier)
- 4. Image resolution on the HDMI connector select according to the resolution of the connected TV
- 5. Image format aspect ratio of the image

Then press tl. OK on "Continue". The receiver will enter the station search menu. Make sure you have connected antenna. Press the red button on the remote control to start searching for stations from all channels. If you wish to search for stations only from selected channels, then move the cursor to the desired channel (frequency) in the list and press tl. OK. This will make a mark in the left column. Then press the green button on the controller for start searching. After the search is complete, press tl. OK on the "Save" field, or you can choose a new one. Search in the "New Search" field.

THE MAIN MENU OF THE RECEIVER

The main menu is available after pressing tl. MENU on the remote control and cotains the following items:

Installation Favourite System Recording Information

6. INSTALLATION

9.1.3 Add after – Here it is possible to set the extension of the recording by 5–15 minutes before it is selected in the timer.

9.1.4 Local Storage – After connecting a storage device, the following menu will be displayed:

Eject - Used to safely disconnect the USB device from the receiver. Set as storage for recording. To record programs, the receiver requires the USB device to be formatted to the file system used by this box. Formatting completely erases the contents of the disk and prepares it for the needs of recording programs - recording! Details - Displays information about the connected USB device.

Notice

To update the software from a USB drive, you must use a FAT32 formatted USB drive.

10. INFORMATION

10.1 SYSTEM INFORMATION

Systémové informace – Here the receiver will display technical information about the receiver.

10.2 PRACTICAL INFORMATION ON THE HBBTV FUNCTION (RED BUTTON)

For proper operation, it is necessary to successfully connect the receiver to the Internet. Connect the LAN cable between the router and this receiver (RJ45 connector). The LAN cable is not included in the package.

Next, make the correct connection to the Internet in the System/Network Settings menu see point 3.7. Please note that the availability of the HbbTV application is subject to the decision of the broadcaster and the current ones conditions.

For this reason, error-free operation of all application features cannot be guaranteed. Receiver in basic specifications meet HbbTV version 1.5 and relevant codecs at the time of market launch (December 2020). If the receiver is successful connected to the Internet and the selected station broadcasts HbbTV, then after selecting this station it will be in the lower right for a few seconds graphic icon symbolizing the availability of HbbTV available in the corner.

Press the red button on the remote to start HbbTV and wait for the application to start. The control of the application is given by the operator and is interactively displayed in the graphics itself application. You can close the application again by pressing the red button.

WARRANTY CONDITIONS

1. WARRANTY PERIOD

The manufacturer provides a warranty for this product for a period of 24 months from the date of purchase of the product by the consumer. The warranty period is extended by the time during which the product was under warranty repair. Warranty only applies to defects caused by a manufacturing error or material defect!

2. WARRANTY CARD

Free warranty service is provided only if you present proof of purchase of the product (receipt) and a correctly completed warranty card - it must include the serial number, date of sale and stamp of the store (assembly company). Copies and incorrectly filled out warranty cards will not be taken into account!

3. REPAIRS IN WARRANTY AND POST - WARRANTY PERIOD

Warranty service must be claimed from the organization where the product was purchased or from the assembly company that performed the installation.

4. SCOPE OF THE WARRANTY

The warranty is void if the defect is caused by mechanical damage, misuse, inattention, unavoidable event (natural disaster), if the product was connected to a supply voltage other than that specified in the technical specifications, and also in case of modifications or repairs performed outside the distributor's service. Nor can the guarantee be invoked where the consumer requires modification or adaptation to extend the functionality of the product (or a system composed of several components) compared to the standard design.

Inter-sat LTD., as the manufacturer of this device, declares that the type of radio equipment TESLA HYbbRID TV T-200 complies with Directive 2014/53 / EU. The full text of the EU declaration of conformity is available on the website https://www.tesla-electronics.eu/

Thank's for your choice.
